Claims 1-45 are allowed.

Claims 1, 21, 41, 43-44 are amended by the Applicant.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with SOSINSKI, JOSEPH [Reg. No. 62,807] on January 30th, 2009.

In the specification:

Please amend on page 11, lines 7-17 as follows:

HTTP: HTTP is the acronym for Hypertext Transfer Protocol, which is the underlying communication protocol used by the World Wide Web on the Internet. HTTP defines how messages are formatted and transmitted, and what actions Web site servers and browsers

should take in response to various commands. For example, when a user enters a URL in his or her browser, this actually sends an HTTP command to the Web site server directing it to fetch and transmit the requested Web page. Further description of HTTP is available in RFC 2616: Hypertext Transfer Protocol--HTTP/1.1, the disclosure of which is hereby incorporated by reference. RFC 2616 is available from the World Wide Web Consortium (W3C), and is currently available via the Internet at the following URL:

~~<http://www.w3.org/Protocols>.~~

Please amend on page 14, lines 1-3 as follows:

URL: URL is the acronym for Uniform Resource Locator, the global Internet address of documents and other resources on the World Wide Web, ~~e.g.,~~

~~<http://www.medicaldictionary.com>.~~

Please amend on page 14, lines 17-25 as follows:

XML: XML is the acronym for the Extensible Markup Language which is a specification developed by the W3C. XML is a pared-down version of SGML that is designed especially for Web documents. It allows designers to create their own customized tags, enabling the definition, transmission, validation, and interpretation of data between applications and between organizations. For further description of XML, see, e.g., Extensible Markup

Language (XML) 1.0 specification which is available from the World Wide Web Consortium

(URL is ~~http://www.w3.org~~), the disclosure of which is hereby incorporated by reference.

The specification is also currently available on the Internet, ~~at the URL,~~

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

As pointed out by the Applicants in the Remark that the cited prior art (US Publication No. 2002/0129060 to Rollins et al. and US Patent No. 6,675,354 to Claussen et al.) taken alone or in combination fail to teach, in combination with the other claimed limitations, *specifying at least one custom action that is desired to be performed by a Web application... mapping a customized name of the customized command tag in a tag library descriptor file to the custom action; embedding the customized command tag with the customized name in a Web page of the Web application; and upon execution of the Web application including the embedded customized command tag in a Web page, invoking the customized command tag for conditionally executing said specified at least one custom action based on run-time conditions of the Web application and run-time values for one or more attributes included in the customized command tag*" as recited in the independent claims 1, 21 and 41.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
